

AmbiLog™

The AmbiLog™ from HearthSense is setting a new standard in vent free gas log technology. Featuring realistic concrete logs cast from real wood, a large glowing ember bed and rich flames, it is the ambient light technology which truly separates the AmbiLog™ from all other logs on the market today. No longer does your fireplace have to become a "dark hole" in your living space during the warmer months, now ambient light technology affords you the ability to enjoy "warmth" from your fireplace without all the "heat". **Form, Function and Affordability.**

AmbiLog™
